Medical Report

ORAL PANORAMIC RADIOLUCENT EXAMINATION REPORT

Teeth-Specific Observations

General Condition

- **Tooth Count:** 23 visible teeth identified within the standard dental arch.
- **Wisdom Teeth:** One visible mandibular left third molar (#18) detected in non-impacted position. No other wisdom teeth visualized.
- **Overall Integrity:** Majority of teeth demonstrate normal morphology and alignment.

Pathological Findings

- Impacted Teeth:

- Clear indication of impacted molar **near #37** (mandibular right).
- Clear indication of impacted molar **near #47** (maxillary left).
- Clear indication of impacted molar **near #27** (maxillary right).

- Caries Suspicions:

- Suspicious for carious lesion **near #47** (maxillary left).
- Areas of concern noted for possible carious involvement **near #16** (mandibular right).

Historical Interventions

- Root Canal Treatments (RCT):

- Rc-treated tooth noted **near #11** (mandibular left incisor).
- Rc-treated tooth noted **near #16** (mandibular right first molar).
- Rc-treated tooth noted **near #25** (maxillary right second premolar).
- Rc-treated tooth noted **near #34** (mandibular left first molar).

- Restorative Procedures:

- Restoration present **near #34** (mandibular left first molar).
 - Crown placement documented **near #34** (mandibular left first molar).
-

Clinical Summary & Recommendations

Priority Concerns

1. **Impacted Molars:** Immediate evaluation required for impacted molars near #37, #47, and #27 due to risk of periodontal inflammation and adjacent tooth resorption.
2. **Caries Suspicions:** Close monitoring of suspicious carious lesions near #47 and #16; consider confirmatory diagnostics and early intervention.

Preventive Measures

- Reinforce oral hygiene education for interproximal areas near impacted molars to mitigate periodontal risks.
- Advise dietary modifications to reduce cariogenic exposure in high-risk regions (#47, #16).

Follow-up Protocol

- **Referral:** Urgent referral to oral surgeon for surgical assessment of impacted molars (#37, #47, #27).
- **Recall Schedule:** 6-month radiographic follow-up to monitor carious lesions (#47, #16) and impacted tooth progression.
- **Endodontic Review:** Annual evaluation of rc-treated teeth (#11, #16, #25, #34) for apical health and restoration integrity.
